FEATURES AND SPECIFICATIONS:

The **KaWa®** Crimped Curved Series are available in three designs based on the popular **KaWa® R600**, **KaWa® R760** and **KaWa® R670** profiles. The regularly spaced ribs on either of the profiles made by a special machine results in a crimped-curved profile that adds beauty and functionality to the building envelope.

ADVANTAGES:

- Fewer structural supports are required for fascias and roofs.
- Aesthetically attractive exterior finish with simple installation.
- Reduced number of flashings and cappings.
